

# Installation instructions

---

Firstly, make sure node is installed. It can be installed via this link: <https://nodejs.org/en/>

To check it has installed correctly these following commands can be ran:

```
node --version  
npm --version
```

Once installed, run

```
npm install
```

To run the server run the following command:

```
node app
```

If SQLite3 and bcrypt fail to install, run these following commands:

## Linux

```
npm install sqlite3 --save  
npm install bcrypt --save
```

## Windows

```
npm install --global --production windows-build-tools  
npm install bcrypt --save  
npm install sqlite3 --save  
npm install  
node app
```
